### DETAILED ACTION

1. Appellant' arguments (Appeal Brief Filed September 22, 2004, Pages 7-8 (Section V, Summary of the Claimed Subject Matter); Pages 12-13, Section VII, Prosecution History, Items 1), 2) and 3)) are persuasive. Rejection of Claims 96-105 has been withdrawn accordingly.

#### ***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance:

The Examiner agrees with Appellants' detailed explanation of "Summary of the **Claimed Subject Matter**" in Pages 7 and 8 of the Appeal Brief. As thoroughly described in this explanation:

The claimed subject matter of the instant invention is directed to an apparatus for inspection of patterned semiconductor wafers in two phases. In the first phase, the complete surface of the wafer substrate is inspected utilizing a comparator for calculating a difference between the inspection signals outputted from the first collection optics and a reference signal to identify locations on the substrate of having defects thereupon (suspected locations) based on a threshold outputted from threshold processor 70.

In the second phase, the suspected locations having a high probability of a defect are received by second collection optics and images indicating the presence or absence of a defect in each suspected location are outputted to a defect classifier for classifying said images outputted from second phase processing.

The features identified, in combination, are neither discussed nor suggested by the prior arts of record.

3. Claims 96-105 are allowed.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
